

Serial No. 09/994,412
Filed: November 27, 2001

viral particles consisting of sense and antisense RNA wherein the sense and antisense RNA comprise homologous nucleotide sequences to a portion of said human aldolase gene.

- II. Claims 9-12, drawn to a process for inhibiting expression of human cyclin gene in mammalian cells or tissues *in vitro* consisting of infecting said cells with viral particles consisting of sense and antisense RNA wherein the sense and antisense RNA comprise homologous nucleotide sequences to a portion of said human cyclin gene.

Applicants hereby elect, Group II, claims 9 to 12, directed to a process for inhibiting expression of human cyclin gene in mammalian cells or tissues *in vitro*.

The foregoing amendment is fully responsive to the Restriction Requirement issued October 30, 2007. Early and favorable consideration is earnestly solicited.

No additional fees are believed due. However, the Director is hereby authorized to charge any deficit, or credit any overpayment, to Deposit Account No. 08-2525.
